

ASAD ALI QURESHI

LEAD / SENIOR SOFTWARE ENGINEER

Lahore, Pakistan • +92 321 4971187 • adqureshi@gmail.com • linkedin.com/in/Asad-Ali-Qureshi

PROFESSIONAL SUMMARY

Results-driven Lead/Senior Software Engineer with **8+ years** of experience building scalable web applications, AI-powered solutions, and enterprise software. Strong expertise in PHP, Laravel, backend architecture, API development, database optimization, and modern AI technologies. Experienced as an **Agentic AI Engineer**, building AI-driven workflows and automating business processes using LLMs, AI agents, and Claude Code. Proven track record of leading engineering teams and delivering solutions across travel technology, healthcare, CRM, and SaaS platforms.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, Laravel, Yii2, CodeIgniter, JavaScript, jQuery, Next.js, Backbone.js, HTML5, CSS3, Bootstrap
- **Backend & APIs:** RESTful APIs, SOAP Web Services, Microservices Architecture, Service-Repository Design Pattern
- **Databases:** MySQL, Database Design & Schema Optimization, Query Performance Tuning, Data Modeling, Indexing Strategies
- **AI & Integrations:** AI Engineering & Automation: Agentic AI Engineering, Claude Code, AI Agents, Business Process Automation, OpenAI APIs, Prompt Engineering, AI Workflow Automation, MCP Concepts, LLM Integration, AI-Driven Features, Calendly Integration, Third-Party APIs (SABRE, Amadeus, Hotel Beds, Booking.com)
- **Tools & Practices:** Git, GitHub/GitLab, Jira, ClickUp, Postman, MySQL Workbench, CI/CD Concepts, Agile Methodologies, Sprint Planning, Code Reviews
- **Leadership:** Project & Team Leadership, Mentoring, Multi-Tenant Systems, Security Best Practices, Performance Tuning

AI ENGINEERING

- **Agentic AI Engineering**
- **Claude Code**
- **AI Workflow Automation**
- **Business Process Automation**
- **Prompt Engineering**
- **LLM Integration**
- **AI Agent Development**
- **OpenAI API Integration**
- **AI-assisted Software Development**

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Team Lead | DroidorJun 2021 - Feb 2026

Led design, development, and evolution of ExploreTECH, a large-scale multilingual (EN/AR) web platform for technology comparison and discovery in the travel-tech ecosystem. Owned backend architecture decisions and cross-functional delivery.

- Served as backend lead and full-stack contributor, architecting Laravel-based APIs, database schemas, and indexing strategies; supported Next.js frontend features.
- Implemented and standardized the Service-Repository design pattern, improving code reusability, maintainability, and modular scalability.

- Designed and optimized high-volume data indexing and multilingual content handling for fast search and retrieval across large datasets.
- Spearheaded launch of ExploreTECH PRO, an AI-powered product with intelligent discovery, chat-based collaboration, and dynamic news feeds via OpenAI API integration.
- Integrated Calendly to enable seamless vendor-buyer meeting scheduling and workflow automation.
- Architected WLS (White Label Solution), a secure enterprise-grade multi-tenant environment for organizations to privately host the platform, including license onboarding and organization-level configurations.
- Led and mentored a 5-member development team, enforcing coding standards, conducting reviews, and ensuring predictable sprint delivery.

Senior Software Engineer / *Rakam Tech* 1+ Year

- Developed and maintained backend services using Laravel and MySQL, integrating major airline APIs including SABRE, Amadeus, PIA, and British Airways.
- Implemented multi-airline search, pricing, availability, and ticketing workflows, ensuring accurate data handling and booking reliability.
- Optimized API response processing and caching mechanisms to improve performance and reduce latency.

Lead Developer — Booking Aggregator (Italian Client) / *Independent Contract* 1 Year

- Led backend development for a global hotel booking aggregator integrating Hotel Beds and Booking.com APIs.
- Implemented advanced hotel search logic including radius-based filtering (up to 12 km) and flexible booking modification/cancellation workflows.
- Ensured stable and optimized third-party API communication through performance tuning and structured error management.

Full-Stack Developer (Independent Contributor) / *SPATAY* 1 Year

- Single-handedly migrated the system from CodeIgniter 3 to CodeIgniter 4, modernizing architecture, performance, and maintainability.
- Integrated multiple airline APIs (SABRE, PIA, Airblue, British Airways) supporting one-way, return, and multi-city bookings.
- Designed and implemented a responsive frontend using HTML, CSS, and JavaScript aligned with the updated backend architecture.

Junior Developer / *AMB Driving Schools* 4-5 Months

- Developed an integrated communication dashboard for 70+ driving schools enabling in-app email management (IMAP/SMTP integration).
- Delivered an intuitive admin panel with searchable inboxes and attachment previews, improving operational efficiency.

Senior Software Developer / *Wangard International* Jan 2019 - Jun 2021

- Call Center CRM (Independent Project): Designed and developed a complete internal CRM system for lead generation and call center operations, including RBAC and interactive performance dashboards.
- EonClinik (Wilcare Hospital): Maintained and optimized Laravel-based backend modules for appointment booking, patient records, and doctor availability.
- Visa Medical Certification Platform (Wilcare Hospital): Solely developed and maintained a platform for issuing embassy-approved medical certificates for New Zealand, Australia, the US, and Canada, using Backbone.js for the frontend.

EDUCATION

M.C.S — Master of Computer Science, Virtual University, Pakistan (2019-2021)

CERTIFICATIONS

- CCNA — Cisco (ID: CSC011275322)
- Basic Programming and Logic Building — Unique Institute of Technology (Aug 2013 - Oct 2013)
- PHP Web Development — Unique Institute of Technology (Nov 2013 - Jan 2014)
